However, the information is very detailed and has great illustrations. The only reason I give it 4 stars is that I wish the publishers would split it into two books. I was unable to read it on the sofa or in bed because of the crushing weight of the book. (If I put it on my car seat it turned the passenger air bag off!) Therefore I had to sit at the table or desk to read. 2 of 2 people found the following review helpful. This book is too big and heavy.

I am sure it is a problem with the app and not the book itself, but still frustrating. The book itself is poorly written and has some misinformation but it is required for class.
