**Ruth Ann Ehrlich RT(R), Joan A. Daly RT(R) MBA, Ellen Doble McCloskey RN MN, Ruth Ann Ehrlich, Ellen Doble McCloskey, Joan A. Daly : Patient Care in Radiography: with An Introduction to Medical Imaging** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Patient Care in Radiography: with An Introduction to Medical Imaging:

1 of 1 people found the following review helpful. EllenBy Helen M. Dale Considering my mother is one of the authors it is hard not to "like" it. I picked this up so that my children can have a copy...signed by the author, of course.

Truly a complete revision, PATIENT CARE IN RADIOGRAPHY, 5th Edition, helps imaging technology students acquire both the technical and the interpersonal skills needed to provide good patient care in the clinical environment.

An excellent orientation to clinical work for the beginning student, this text serves as an up-to-date reference on patient care. Excellent pedagogy includes objectives, vocabulary lists and study questions. Use of photo essays to describe procedures has been continued from previous editions and expanded as a learning tool. **NEW TO THIS EDITION:** \* Full coverage of introductory topics includes the history of radiography, department organization, ethics, clinical environment, job opportunities and radiation protection. \* New design features the addition of a second color to line drawings, new photographs and a second color for openers, headings, boxes and tables. \* Expanded coverage includes cultural implications and development of transcultural communication skills, pharmacology, new information on ostomies, special treatment situations, health care delivery systems, subspecialty certification, new information about contrast media, normal vs. abnormal ECGs and lead placement. \* Fully revised material is presented throughout the text such as patient assessment, types of infection, death, dying, hospice, most recent code of ethics, updated ICU and trauma radiography, updated medication administration information and accreditation of radiography programs. \* New glossary of key terms has been compiled for easy access in an appendix. \* New infection control information includes updated medication administration information, standard precautions, emerging diseases, basic microbiology and tuberculosis to provide timely information for a changing environment. \* Integration of patient care with procedural skills emphasizes the importance of patient care. \* Multiple study aids include objectives, study questions, vocabulary lists and appendices.
