Split/shared Billing
 *When a hospital equipped E/M services shared between a physician and an NPP from the same group practice and the physician provides any face-to-face portion of the E/M encounter with the patient, the service may be billed under the physician or the NPP. However, if there was no face-to-face encounter between the patient and the physician, the service may only be billed under the NPP when possible. This guideline is not applicable to critical care, as split/shared billing is not allowed.

*The visits described by counseling or coordinating care, do not include face-to-face time (inpatient or out) flow time (inpatient) and that more than 50% of total time was dominated by counseling or coordinating care (in or out of any components).
 *As time is assigned to observation care/discharge.
