I have read this book about thirty times already and can't put it down. The man is pure genius, and I am not just saying that. He is THE Vince Mandracchia, folks.

Such a thorough and up-to-date issue of the Clinics in Podiatric Medicine and Surgery will be pulled from the bookshelf time and again by all podiatrists, not simply those who handle pediatric cases. From flatfoot to trauma and sports-related injuries to external fixation, you'll find all you need, and more, to evaluate and treat the pediatric population.
