In this first edition, Pediatric ICD-10-CM: A Manual for Provider-Based Coding strives to bring to the pediatric provider, coder, and biller the most accurate and easy-to use manual on ICD-10-CM yet. Composed entirely with a pediatrics focus, this manual exclusively features codes and guidelines for physician- and provider-based coding, all in a simplified yet familiar format. The full draft of the ICD-10-CM code set comes in at well over 1,000 pages. This

book condenses that large and potentially cumbersome book into 400 pages of the most relevant, pediatrics-related codes and guidelines. It also fully integrates into the tabular list specific chapter and code guidelines. Guidelines are now included directly at the chapter and code level, ensuring that coders will always use the right codes in right circumstances. Features include
