Joan C. Arvedson, Linda Brodsky : Pediatric Swallowing and Feeding: Assessment and Management (Early Childhood Intervention Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Pediatric Swallowing and Feeding: Assessment and Management (Early Childhood Intervention Series):

Pediatric Swallowing and Feeding: Assessment and Management focuses on an area of utmost concern in many young infants and young children with disabilities. The editors/authors, Drs. Arvedson and Brodsky, cogently organize and present a comprehensive, interdisciplinary text on this critical area in health care. By providing a wealth of practical information against the backdrop of a management team, this books goes beyond merely stating that interdisciplinary teams are important. It is one of those rare books that accomplishes a host of purposes and will prove an invaluable resource to personnel from many disciplines.

"Excellent reference text for those interested in better understanding the multidimensional nature of feeding problems in children...a wonderful resource of well-referenced information available for the individual feeding specialist." -

Dysphagia" (Offers a broad range of strategies for evaluation and treatment and reinforces the value of the team approach for the management of this multifaceted pediatric problem." - Journal of the American Dietetic Association "The chapters are comprehensive in terms of diagnoses covered and specific eating problems addressed, as well as state-of-the-art methodology and technology described." - Physical and Occupational Therapy in Pediatrics About the Author The Children's Hospital of Buffalo
