Not too thrilled about the book as it looks like the pictures are photo copies; dark, not clear. I need to see the pictures clearly as they are part of my

training. I am just not happy with it. I paid over 100 dollars for a paperback book and I need it to be good. What can I do? How do I get a better copy? I had her 1st version, so I knew thus would only be better and up to date. She includes recommendations that families can follow through with. The information is necessary for my job, so I can provide ethical treatment to our PICU and NICU .
