**Richard K. Beck : Pharmacology for the EMS Provider** before purchasing it in order to gage whether or not it would be worth my time, and all praised Pharmacology for the EMS Provider:

0 of 0 people found the following review helpful. Good Book!By Kimberly WrightThis book is VERY helpful! I found that it breaks the math down and makes it very simple and easy to follow! I recommend this book to anyone going through Paramedic School!0 of 0 people found the following review helpful. Five StarsBy Randy E.Thank you very much0 of 1 people found the following review helpful. OK book, just too expensive.By Jonathan NicholsIt's not a bad book by any means, but there's a few typos that caused some confusion, and it seems that about 1/3 of the book is just a drug list, which is stuff that I can find anywhere. It's not as informative as some other books. But it's really way too expensive for what it is.

The Fourth Edition of PHARMACOLOGY FOR THE EMS PROVIDER is a clear and thorough text ideal for both

Advanced Emergency Medical Technician (AEMT) and Paramedic levels. This book is based on the pharmacology section of the National Highway Traffic Safety Administrations National EMS Education Standards and reflects current Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS) curricula. Provided throughout the book are detailed profiles of pre-hospital medications, including mechanism of action, indications, contraindications, precautions, routes and dosages, side effects, and EMS considerations. Appendices also present information on herbal drugs, common home medications, and street drugs EMS providers may encounter outside of the hospital setting. This wealth of in-depth material logically organized for effective learning and carefully tailored to national standards and curricula, makes this practical guide an invaluable resource for anyone pursuing training or certification in an EMS field.

"The author is clearly well versed in pharmacology. He approaches the subject matter with clarity and language that is easy to follow for both the student and the instructor."Matt Keeler, Palm Beach State College  
"It [the book] could be easily taught and easily understood by the studentsThe material is clear, precise, and easy to self study."Thera Granger, Lamar State College  
About the AuthorRichard K. Beck, M.S., NREMT-P, is associate dean for academic affairs at Broward College in Fort Lauderdale, Florida. He holds a Master of Science degree in Emergency Health Services and is a certified National Registry of Emergency Medical Technicians Paramedic. Beck has been active in the Emergency Medical Services (EMS) field for 35 years, serving as a firefighter, paramedic, flight paramedic, instructor, and program administrator. Before joining the Broward College faculty, he served as manager of the EMS Training Center at the Thomas Jefferson University Hospital in Philadelphia. He also previously served as lead paramedic instructor and Advanced Cardiac Life Support (ACLS) coordinator at St. Petersburg College in Florida.
