1 of 1 people found the following review helpful. PharmBy foxyI purchased this book as a supplement for my NP pharm class and I am very pleased with this book. This book provides valuable information linked to disease processes in an easy to read format. I highly recommend this book for anyone taking a pharm class. This book is an excellent reference that I will use after I graduate and go into practice. I especially like the feature of being able to have it as an ebook since it is a large book it helps to be able to focus on whatever chapter you want to read by pulling it up on your computer.4 of 4 people found the following review helpful. Excellent TextbookBy J. MooreThis was a purchase for

my NP program pharm class. However, it is turning out to be one of the most current and helpful books I have purchased. It goes into detail about trending medications and breaks down the underlying problems and drug mechanisms clearly. Might seem expensive but it is compatible to three prior books I have purchased all wrapped up into one! 0 of 0 people found the following review helpful. useful, concise text By Susan Vaughan this textbook is concise, covering a lot of info in an easy to digest way. my only complaint is that my book was misbound and part of one chapter is at the end of the book. still, that hasn't changed my opinion of the material. have not yet used the cd. seller was quick with shipping. no problems at all.

"The book covers the epidemiology, etiology, pathophysiology, clinical presentation, and treatment of more than 100 disease states. Brief patient cases help develop the critical thinking abilities of readers and illustrate the clinical relevance of the topic, while the tables and figures aid in understanding the different concepts." 3 Stars."--Doody's Service (Doody's 2008-11-18) About the Author Marie Chisholm-Burns, PharmD, MPH, FCCP, FASHP, Department Head Professor, Department of Pharmacy Practice Science The University of Arizona College of Pharmacy Professor, Department of Surgery The University of Arizona College of Medicine Barbara G.
