**Jennifer A. Pryor PhD MBA MSc FNZSP MCSP, N. Heramba Prasad MD FACEP : Physiotherapy for Respiratory and Cardiac Problems: Adults and Paediatrics, 3e (Physiotherapy Essentials)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Physiotherapy for Respiratory and Cardiac Problems: Adults and Paediatrics, 3e (Physiotherapy Essentials):

Physiotherapy for Respiratory and Cardiac Problems is now internationally recognised as an essential textbook and reference source for students and practitioners working with patients with cardiac and respiratory problems. The book

takes a problem solving approach to the practical skills necessary for the assessment, planning and implementation of physiotherapy for both children and adults. The text follows a clear and logical structure making it easy to read, facilitating quick reference and fast revision. It is divided into 2 main sections: Assessment, investigations, skills and techniques  
Physiotherapy and medical management  
This new edition of *Physiotherapy for Respiratory and Cardiac Problems* continues to provide a reliable and comprehensive source of information for all those who are involved in providing this care. Written by an international multidisciplinary team of clinical experts in the field of cardiac and respiratory care. Addresses the management of children as well as adults. Relevant theory is explained and applied to the description of practical skills. The problem-solving approach provides guidance on dealing with clinical situations. Clear and consistent chapter structure. References and further reading lists direct the reader to more detailed information. All chapters updated. Emphasis on evidence-based practice. More extensive coverage of the management of children - new co-editor is a paediatric specialist. Many new contributors - all widely respected specialists in their field. A new section on the interpretation of the electrocardiogram (ECG). New authors for the chapters on pulmonary rehabilitation, cardiac rehabilitation and bronchiectasis, primary ciliary dyskinesia and cystic fibrosis. Many new illustrations - both line drawings and photographs.

"A comprehensive, up to date text covering a wide range of topics. I would be happy to recommend this textbook as an essential textbook for students and practitioners in the field of cardiorespiratory care ." Marie Guidon, MSc, MCSP, MISCAP Associate Professor of Physiotherapy, School of Physiotherapy, Royal College of Surgeons in Ireland, *Physiotherapy Ireland* Volume 23, No. 1, Journal of the Irish Society of Chartered Physiotherapists, June 2002  
to the combination of evidence based information and easy reading I feel that this book is one of the must have texts for all physiotherapists with an interest in respiratory or cardiac problems ." Laura Vincent, Senior II Physiotherapist, Royal Liverpool Hospital, *The Association of Chartered Physiotherapists Newsletter*, January 2002  
About the Author  
Pryor was until recently Head of Physiotherapy at the Royal Brompton and Harefield NHS Trust , London - Britain's leading chest and heart hospital. She is now a research fellow there and is combining work on research with the latest in clinical practice. She was co-editor to the first two editions of this book. Prasad was a contributor to the previous edition of this book. Her specialist area of practice is with children with cystic fibrosis. Like Pryor she is working as a researcher in a centre of clinical excellence. Both authors have given papers at international meetings for both doctors and physical therapists.
