This book, which can be read in about an hour, is only about one thing - publishing a book. As a marketer, it took me about 5 minutes in the bathroom to get the gist that there won't be any recipe, they won't talk about a marketing mix, mottos, brands or anything outside the idea that Publishing = Referrals/Celebrity. It might help, but there's much more to a successful practice than writing a book about revision rhinoplasty.2 of 3 people found the following review helpful. Overall I would say the book makes some interesting points about marketing a cosmetic practice and establishing yourself as an "expert" in whatever field you are practicing. According to the authors the secret recipe is for the doctor to write a book on their area of expertise, which they will gladly help you with for just \$24,000. My advice is save your money and just buy Robert Cialdini's book "Influence: The Psychology of Persuasion."
