James B. and Hannah Yoseph : Poisoned!: Recovery From Statin quot;Side Effectsquot; before purchasing it in order to gage whether or not it would be worth my time, and all praised Poisoned!: Recovery From Statin quot;Side Effectsquot;:

21 of 21 people found the following review helpful. Practical help for statin-injured victimsBy Joey NineronI almost died from taking statins. After stopping statins three years ago, I felt dramatic improvement in my condition. I felt euphoric the first week. I was alive again! Like many statin-injured victims though, my recovery leveled off. Three

years into my recovery, I began to feel like my symptoms might be increasing again. Then I discovered the new books published by the Yosephs. By applying the science based diet recommended by the Yosephs, and avoidance of toxic drink and dead food, I have felt a new surge in my recovery. I feel energy and vigor I have not felt in years. I still have damage on a cellular/nuclear level, but now I can take matters into my own hands, and give my cells all the nutrition, and avoidance of toxicity I possibly can. The Yoseph statin-injury recovery book, "Poisoned!", is unique among the statin "truth" books. It offers the most in-depth science on a cellular level, and the most practical help for recovery. It is written by people who have that extremely rare combination of intellect, genuine compassion, love for truth, and the qualities of love and courage. There is no better information out there for the statin-injured. Thank you James and Hannah! 12 of 12 people found the following review helpful. VALUABLE INFORMATION By G. Perry THIS HAS CHANGED MY DIETARY HABITS, GOOD INFORMATION ON HOW TO RECOVER FROM STATIN POISONING. I'M SLOWLY GETTING BACK TO NORMAL, AND I'M SURE THIS INFORMATION HELPED. 5 of 5 people found the following review helpful. Thank You! By Lynn Culver This is the best information I have found in almost four years of searching. This info has not been available anywhere else that I have seen.

"Poisoned!" is the sequel to "How Statin Drugs Really Lower Cholesterol (And Kill You One Cell at a Time)". If you have ever taken statins, you have been poisoned. "Poisoned!" is about paradigms and a whole new way to look at food, medicine and the world. It questions and challenges everything you thought you knew. It is about hope for a new and better way of life for us all. Can we heal ourselves? Is it enough? Can we change the world, as we now know it? It will change your life forever.
