Susan M. Sanderson Author : Practice Management and EHR: A Total Patient Encounter for Medisoft Clinical with Connect Access Card before purchasing it in order to gage whether or not it would be worth my time, and all praised Practice Management and EHR: A Total Patient Encounter for Medisoft Clinical with Connect Access Card:

0 of 0 people found the following review helpful. I got exactly what I was expecting, expensive, but did what it needed to. By Kris Ten This is exactly what I was expecting. Unfortunately, it was super expensive, and one needs the code to work with this book in class. I found out later on that I could buy it used, in good condition, here on and purchase the code online, for a FRACTION of the price. That's what I will do in the future. This came quickly and in great condition. I can recommend for those reasons. What I don't like about working with this book, is the operating flash

presentations, and watch-it, try it... what a pain. Definitely bring some patience with you. I wish you all the best.0 of 0 people found the following review helpful. The book is good. My only complaint was how the accompanying online ...By CustomerThe book is good. My only complaint was how the accompanying online homework section was too small and unless you had a large screen was hard to use. It would tell me I was doing something wrong even though I was trying to click the right thing.

Practice Management and EHR: A Total Patient Encounter for Medisoft Clinical is a unique one-semester text designed to teach allied health students how to work with an integrated practice management and electronic health record program. It covers EHR and insurance and patient billing so students obtain a comprehensive picture of documenting the administrative and clinical tasks that take place during each step of the patient encounter during an office visit. It prepares students for employment in both administrative and clinical positions in a medical office.

About the AuthorSusan M. Sanderson has authored all Windows-based editions of Computers in the Medical Office. She has also written Case Studies for use with Computers in the Medical Office, Electronic Health Records for Allied Health Careers, and Practice Management and EHR: A Total Patient Encounter for Medisoft Clinical. In her more than fifteen years experience with Medisoft, Susan has participated in alpha and beta testing, worked with instructors to site-test materials, and provided technical support to McGraw-Hill customers. In 2009, Susan earned her CPEHR (Certified Professional in Electronic Health Records) certification. In addition, she is a member of the Healthcare Information and Management Systems Society (HIMSS) and the eLearning Guild. Susan is a graduate of Drew University with further study at Columbia University.
