Bryan E. Bledsoe, Dwayne E. Clayden : Prehospital Emergency Pharmacology (6th Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Prehospital Emergency Pharmacology (6th Edition):

1 of 1 people found the following review helpful. Good but needs to be proof read and reevaluated.By rachel davisGood but not great. Some small errors and information is just missing as another reviewer said. Sort of like it was written and not proof read to see if all pertinent information is present. Also talks about techniques that would never be used in Pre-Hospital care including some that were phased out in the 80s(30 years before this book was written). I don't understand how this is the 7th edition, it really pains me to see that they just produce new editions to make profits not to actually improve the original work.2 of 2 people found the following review helpful. 7th EditionBy

LLNothing very illuminating here. I'm a fan of Mr. Bledsoe, but this textbook was disappointing. You would better invest your money elsewhere. The book is basically an overview of drugs with no real information on administration. You can find the same information for free on the web. 1 of 1 people found the following review helpful. Full of errors and typos. Information at times gets ...By Ken L. Full of errors and typos. Information at times gets hard to read because of it.

This pharmacology book and handy reference is a complete guide to the most common medications used in prehospital care. It reflects current trends in prehospital care and the most recent drug information. This revision will update the book to cover the current AHA guidelines for cardiac care and will be updated to include the most recent drug information available. Chapter topics include pharmacokinetics and pharmacodynamics; administration of drugs; drug dosage calculations; fluids, electrolytes, and IV therapy; the autonomic nervous system; drugs used in the treatment of emergencies: cardiovascular, respiratory, metabolic-endocrine, neurological, obstetrical and gynecological, toxicological, behavioral, and gastrointestinal; and drugs used in pain management. For practicing paramedics.

"I am using [Prehospital Emergency Pharmacology] in the current Paramedic class and am getting rave reviews of it. Thank you for providing the profession such an excellent addition to the Paramedic course." Carol Crockett, Rescue Training in Savannah, GA About the Author DR. BRYAN BLEDSOE Dr. Bryan Bledsoe is an emergency physician with a special interest in prehospital care. He received his B.S. degree from the University of Texas at Arlington and his medical degree from the University of North Texas Health Sciences Center/Texas College of Osteopathic Medicine. He completed his internship at Texas Tech University and residency training at Scott and White Memorial Hospital/Texas AM College of Medicine. Dr. Bledsoe is board certified in emergency medicine. Prior to attending medical school, Dr. Bledsoe worked as an EMT, a paramedic, and a paramedic instructor. He completed EMT training in 1974 and paramedic training in 1976 and worked for 6 years as a field paramedic in Fort Worth, Texas. In 1979, he joined the faculty of the University of North Texas Health Sciences Center and served as coordinator of EMT and paramedic education programs at the university. Dr. Bledsoe is active in emergency medicine and EMS research. He is a popular speaker at state, national, and international seminars and writes regularly for numerous EMS journals. Dr. Bledsoe is on the faculty of the University of Nevada, Las Vegas. He is active in educational endeavors with the United States Special Operations Command (USSOCOM) and co-chairs their Certification and Evaluation Board (CEB). Dr. Bledsoe has authored several EMS books published by Brady, including Paramedic Care: Principles Practice, Essentials of Paramedic Care, Intermediate Emergency Care: Principles Practice, Critical Care Paramedic, Anatomy Physiology for Emergency Care, Prehospital Emergency Pharmacology, and Pocket Reference for ALS Providers. He is married to Emma Bledsoe. They have two children, Bryan and Andrea, and a grandson, Andrew, and live on a ranch south of Dallas, Texas. He enjoys saltwaterfishing and warm latitudes.
