Complete Pulmonary Function Testing our commitment to unparalleled quality has made Quinton the leader in cardiopulmonary stress testing. With the introduction of Quinton's MasterLab PFTB Body Box System, we now bring that commitment to pulmonary function testing. MasterLab incorporates the features and flexibility demanded by PFT labs insisting on accurate and reliable performance. MasterLab provides: Modular Design - Purchase only what you need now and add to your system as your needs grow. Advanced Computer (IBM compatible) protects against computer obsolescence. Color monitor and printer are standard. Ease of Operation - MICROSOFT Windows simplifies operation and allows you to concentrate on the monitor. Help screens provide additional on-screen operational instructions. Wide Variety of Tests - Including flow-volume loops, slow VC, MW, single-breath DLCO, helium FRC, airway resistance, and TGV. Custom Report Formats - You can design and store up to 100 report formats with complete report content flexibility. Cross Contamination Control - With a simple flip of a lever, you can remove the patient cable block for cold sterilization. Bulk hoses are a thing of the past. Service - A nationwide network of factory-trained field service engineers will keep your equipment in peak operating condition and assures that an unforeseen problem will be quickly resolved. MasterLab is manufactured by Jaeger to Quinton (Typographical errors above are due to OCR software and don't occur in the book.)
