Our lead author K.M.Farooq has over 39 years of experience in the healthcare field and especially in patient care area. His expertise and input has served as a valuable resource which provided a very unique touch to this project. After many years of working on this project, the book is ready and we are proud to present our book "RESTORATIVE CARE TEXTBOOK: THEORY AND CLINICAL APPROACH". The authors have tried to keep the book concise and to the point. The knowledge in this book has been provided for individuals planning to pursue a certified nursing assistant (CNA) , restorative aide (RA), restorative care assistant (RCA), restorative nursing assistant (RNA), rehabilitation therapy technician (RTT), patient care technician (PCT) or (PCA) associate profession at a postsecondary or college level. The language used in the book is simplistic and somewhat easy to comprehend for individuals to understand the concepts of patient care.
