Scott W. Atlas : Restoring Quality Health Care: A Six-Point Plan for Comprehensive Reform at Lower Cost (Hoover Institution Press Publication) before purchasing it in order to gage whether or not it would be worth my time, and all praised Restoring Quality Health Care: A Six-Point Plan for Comprehensive Reform at Lower Cost

(Hoover Institution Press Publication):

9 of 13 people found the following review helpful. Worthless read. Author is clueless. By Mariana Giraudo Useless book with very basic ideas. For example, the author expects everyone to have an H.S.A account to reduce their taxes and save more towards health related expenses. That's ridiculous. Most Americans can't save enough for retirement, for college tuition, for catastrophic events, let alone, health care needs. Only the ultra rich can do that. Thus his entire premise is just false and unattainable. The only point I agree with is to offer preventive care via nurses and PAs. But guess what Scott Atlas, the UK system that you hate so much does exactly that. 5 of 10 people found the following review helpful. Excellent - a must read to understand what is structurally ... By Silicon Valley Ed Excellent - a must read to understand what is structurally wrong with the ACA and why / how it can be fixed. A quality book from the Hoover Institution. 4 of 8 people found the following review helpful. Five Stars By Gordon Tian Thanks the author's views and I hope these plans can become a reality!

In *Restoring Quality Health Care*, Dr. Scott Atlas examines the status of US health care, particularly in light of the Affordable Care Act, and presents a series of key reforms to meet the significant health care challenges facing the nation. Atlas proposes a six-point, strategic, incentive-based reform plan for US health care. The plan aims to instill market-based competition, empower consumers, and reduce the federal government's authority over health care.

About the Author Scott W. Atlas, MD, is the David and Joan Traitel Senior Fellow at the Hoover Institution, and senior fellow by courtesy at the Freeman Spogli Institute for International Studies at Stanford. Atlas's research interests are domestic and global health care policy, particularly the role of government and the free market in pricing, quality, access, and technology innovation.
