Wasn't sure how helpful it would be but am pleasantly surprised how well written and well presented this book is. Extensive coverage of nealy ALL emergency presentations and conditions .I think it has been written mainly for " on the floor " referencing but its unique , comprehensive style of presentation and content is equally well suited for a quick revision if you are preparing for an exam, especially ones

that have VAQs and SAQs like the ACEM Fellowship(Australian/NZ) .Wont help much with MCQs. You need to have a diagnosis already made though but it will give everything else you need to know right from pre hospital to final disposition stage. Highly recommended. Ideal for the last minute revisions !0 of 0 people found the following review helpful. Five StarsBy Roy C. Wood MDGreat2 of 2 people found the following review helpful.
