**Cynthia Richburg : School-Based Audiology** before purchasing it in order to gauge whether or not it would be worth my time, and all praised School-Based Audiology:

0 of 0 people found the following review helpful. Five StarsBy SingIt looks like a brand new book. Thanks!!

Written principally with the AuD student in mind, School-Based Audiology takes the reader through the history of audiology in the schools, focusing on legislation that has shaped the face of school-based audiology as it is practiced throughout the United States. Core concepts involving academic achievement in students who are deaf/hard-of-hearing, classroom acoustics, hearing screening programs, hearing loss prevention programs, diagnostic evaluation

protocols, hearing aid and FM system verification procedures, and classroom amplification are covered throughout the chapters. Concepts regarding collaboration with other school-based professionals and classroom accommodations and modifications are outlined and provide examples for real-life application. Each chapter of this textbook concludes with a list of vocabulary words and terms used in the educational environment. Practice management concepts not typically discussed in textbooks on this topic are presented, including minimum competencies, third-party billing, program outcome evaluation, mentoring, and preceptoring. Recently qualified and even seasoned audiologists will appreciate attention given to recent advances in areas like cochlear implants, auditory processing disorders, and auditory dys-synchrony as they relate to managing students with hearing loss.

About the Author Cynthia McCormick Richburg, Ph.D., CCC-A is an Associate Professor in the Special Education and Clinical Services Department at Indiana University of Pennsylvania. Donna Fisher Smiley, Ph.D., CCC-A is an audiologist and coordinator for the Educational Audiology/Speech Pathology Resources for Schools (EARS) Program at Arkansas Children's Hospital.
