**Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Scientific Standards for Studies on Modified Risk Tobacco Products : Scientific Standards for Studies on Modified Risk Tobacco Products** before purchasing it in order to gage whether or not it would be worth my time, and all praised Scientific Standards for Studies on Modified Risk Tobacco Products:

Smoking-related diseases kill more Americans than alcohol, illegal drugs, murder and suicide combined. The passage of the Family Smoking Prevention and Tobacco Control Act of 2009 gave the FDA authority to regulate "modified risk tobacco products" (MRTPs), tobacco products that are either designed or advertised to reduce harm or the risk of tobacco-related disease. MRTPs must submit to the FDA scientific evidence to demonstrate the product has the potential to reduce tobacco related harms as compared to conventional tobacco products. The IOM identifies minimum standards for scientific studies that an applicant would need to complete to obtain an order to market the product from the FDA.
