Sharon A. Gutman, PhD, OTR/L, Alison B. Schonfeld : Screening Adult Neurologic Populations: A Step-by-Step Instruction Manual, 2nd Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Screening Adult Neurologic Populations: A Step-by-Step Instruction Manual, 2nd Edition:

1 of 1 people found the following review helpful. Five Stars By Chelsea The book came as expected and on time. 1 of 1 people found the following review helpful. Three Stars By Gootgc 1 of 1 people found the following review helpful. Beware! By elizabeth a walton This book was printed wrong. It has the first 14 pages, the SAME 14 pages again and then skips to page 47! I'm hoping the replacement has all of the pages.

From traumatic brain injury to dementia, occupational therapists working with adults with neurological difficulties must be able to efficiently use various screening methods to pinpoint deficits and determine how they affect a client's

daily functioning. Already a well-used staple in hundreds of occupational therapy clinician's libraries and classrooms, *Screening Adult Neurologic Populations* guides occupational therapists through the entire screening process in an easy-to-use format. This updated edition provides detailed steps for cognitive, functional visual, perceptual, sensory, motor, cerebellar function, cranial nerve function, neuropathy, peripheral nerve function, and dysphagia screening in addition to a new section on mental status. Each chapter has screening forms that can be printed from the enclosed CD-ROM, and a new detailed case study guides occupational therapy students and clinicians through the evaluation process. Clearly outlining how to administer clinical screens with step-by-step instructions and extensive photographs, this book is ideal for occupational therapy students and remains an essential tool for clinicians and therapists working in community and home health settings.
