John F. "Skip" Coleman : Searching Smarter before purchasing it in order to gage whether or not it would be worth my time, and all praised Searching Smarter:

0 of 0 people found the following review helpful. Great resource for firefighters of all ranksBy JeffHThis book establishes the foundation for solid, thorough searches. If you are looking to improve your crews ability to search, with an established system, this resource is for you. It has made a difference with my crew and my organization!

In his latest book, author Skip Coleman takes a comprehensive look at search for the fire service. Searching Smarter defines the three most common types of search (the standard, oriented, and team search) and applies them to existing

common occupancy types (residential and commercial occupancy). It also discusses the relationship between command and other divisions/groups, search basics, and reading buildings for search. It is an important resource for firefighters riding all apparatus types, company and chief officers, and paid and volunteer firefighters.
