William F. Engdahl : Seeds of Destruction: The Hidden Agenda of Genetic Manipulation before purchasing it in order to gage whether or not it would be worth my time, and all praised Seeds of Destruction: The Hidden Agenda of Genetic Manipulation:

4 of 4 people found the following review helpful. Another good account of how the biotech industry has corruptedBy J. MaronAnother good account of how the biotech industry has corrupted, covered up and maligned many, in an attempt to totally control our food supply. I believe we will be seeing more and more evidence that points to such

corruption and the lies we have been "fed" from the biotech industry and sanctioned by the FDA and the government.³ of 3 people found the following review helpful. *The World Is Not Enough...* By Blue Rabbit Reads like an intriguing James Bond script... intrigue and corruption in high places. World domination is not enough for Monsanto or the Rockefellers, they want genocide too. Kept reading each chapter hoping for some great super-hero to sort it out, but there is no movie ending here, but more like the preparations being put in place for the Four Horsemen of the Apocalypse to be released upon the world. A real Eye-opener and information everyone should know so we understand what is really going on behind the scenes of World Governments. Could not put it down till I read it through.⁰ of 0 people found the following review helpful. Must read to understand the origins of GMOs By Tony H An absolute must read for anyone concerned about genetically modified foods and what they do to people. This is more of the politics behind it rather than a scientific review of GMO. For more science of GMOs, read *Seeds of Deception*. The politics behind it is just as important because the author shows how it really began with the Eugenics movement, which the NAZIs adopted as a national policy. then after that was discredited, the Rockefellers brought it into the mainstream of America and it's not just genetically modified foods, it's people too. Scary stuff, but real.

This skillfully researched book focuses on how a small socio-political American elite seeks to establish its control over the very basis of human survival, the provision of our daily bread. Control the food and you control the people. This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms. The author reveals a World of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain worldwide control over food production. The book is an eye-opener, a must-read for all those committed to the causes of social justice and World peace.

If you want to learn why biotech corporations insist on spreading GMO seeds around the World you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist... --Marijan Jost, Professor of Genetics, Krizevci, Croatia
If you want to learn why biotech corporations insist on spreading GMO seeds around the World you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist... --Marijan Jost, Professor of Genetics, Krizevci, Croatia
The book reads like a murder mystery of an incredible dimension, in which four giant Anglo-American agribusiness conglomerates have no hesitation to use GMO to gain control over our very means of subsistence... --Anton Moser, Professor of Biotechnology, Graz, Austria
What is so frightening about Engdahl's vision of the world is that it is so real. In this new age of free markets, everything science, commerce, agriculture and even seeds have become weapons in the hands of a few global corporation barons and their political fellow travelers. --Dr. Arpad Pusztai, biochemist, formerly of the Rowett Research Institute, Scotland.
