Jürgen Bschaden : ShenProfessional - Software for Acupuncture and Traditional Chinese Medicine before purchasing it in order to gauge whether or not it would be worth my time, and all praised ShenProfessional - Software for Acupuncture and Traditional Chinese Medicine:

This user-friendly software for traditional Chinese medicine (TCM) offers valuable information to the therapist and acupuncturist. It contains: coverage of the basic aspects of TCM, a comprehensive diagnostic tool comprising more

than 4000 symptoms and indications as well as western illnesses and disorders. Anatomic tables indicate all relevant acupuncture points. Additionally, the software contains documentation on diagnosis and therapy, and templates of well structured medical files for the patient database.

Aus den Rezensionen: " Shen Professional wendet sich vor allem an den an Akupunktur und Diagnostik in der traditionellen chinesischen Medizin interessierten Leser. Englischkenntnisse sind nicht notwendig, da auch eine deutsche Version auf der CD vorhanden ist. Zu allen Akupunkturpunkten gibt es ausführliche und optisch sehr gefällige Bilddateien. Shen Professional ist ein praktisches elektronisches Nachschlagewerk der TCM, das auf Grund der übersichtlichen Menüführung einfach zu verwenden ist. Darüber hinaus empfiehlt es sich mit seinen Möglichkeiten für Patientendokumentation und Abrechnung zum Einsatz in der Praxis." (Dr. Masom Gharabaghi, in: Kärntner Ärzte Zeitung, 2007, Issue 5, S. 16)

From the Back Cover ShenProfessional Software for Acupuncture and Traditional Chinese Medicine Acupuncture Charts with high quality graphics Detailed Point information on all 361 acupoints The foundations of TCM on more than 100 pages with numerous illustrations for interactive hyperlink studies TCM information on Chinese diagnoses: symptoms, causes, treatment tips, root and branch and acupoint combinations Symptoms catalogue with more than 4000 symptoms, indications and Western medical diagnoses with accompanying TCM diagnostics Diagnosis Analysis of whole symptom scopes, including "root and branch" diagnostics Compiling your own acupoint combinations Management of patient records Documentation of examinations and treatments applied Full-text search Interactive desktop layout User-friendly through bubble help
