0 of 0 people found the following review helpful. GreatBy CustomerAs described. I bought it used and it seems like new.0 of 0 people found the following review helpful. Five StarsBy CustomerGreat shape, and arrived right on time! Important because it was for school! Thanks again!!0 of 0 people found the following review helpful. Five StarsBy BMarshallFast shipping and basically brand new book. Thank you!!!!

Get the most out of SimChart for the Medical Office with step-by-step guidelines! A companion book to SimChart for the Medical Office, Learning the Medical Office Workflow provides clear instructions for all of the medical assisting

simulation assignments in the online program. In completing these exercises, you'll get over 50 hours of hands-on practice with entering data into the electronic health record and performing essential ABHES and CAAHEP competencies that's more practice than any other EHR product on the market. Using best practices and detailed screen shots, this how-to manual makes it easier to work through each of the tasks in SimChart for the Medical Office. Hands-on practice makes it easier to learn core competencies, with exercises simulating the actual administrative duties of the medical assistant. 110 interactive assignments are aligned with ABHES and CAAHEP competencies from front office skills to clinical skills to practice management skills providing more than 50 hours of documentation practice. Safe learning environment allows you to learn and practice tasks without fear of making a mistake affecting real patients. Integration of practice management and electronic health records includes key skills such as patient registration, scheduling, office management, and insurance processing, as well as EHR skills such as patient record documentation and written orders. Simulation instructions and screen shots are provided with assignments to guide you through each step of each task. NEW! Updated competencies reflect CAAHEP's latest standards for Medical Assisting.
