**Hynek Pikhart : Social and Psychosocial Determinants of Self-Rated Health in Central and Eastern Europe** before purchasing it in order to gage whether or not it would be worth my time, and all praised Social and Psychosocial Determinants of Self-Rated Health in Central and Eastern Europe:

Life expectancy in countries of Central and Eastern Europe is substantially shorter than in Western Europe, and a similar divide exists in self-rated health. This exhaustive study of populations in seven Central and European countries - Russia, Lithuania, Latvia, Estonia, Poland, Czech Republic and Hungary - examines the social and psychosocial determinants of this divide. Practitioners and graduate students of public health and social psychology will find this an invaluable resource.
