Marcia Egan, Goldie Kadushin : Social Work Practice in Community-Based Health Care before purchasing it in order to gauge whether or not it would be worth my time, and all praised Social Work Practice in Community-Based Health Care:

Make sure your practice skills are up-to-date with the changes brought on by managed care. As a result of escalating costs, the focus of health care in the United States has shifted from inpatient, hospital-based care to outpatient care in the community. Social Work Practice in Community-Based Health Care is a comprehensive guide to the knowledge and skills needed to provide effective and efficient practice within a managed-care context that's focused on a

diversified, aging consumer population and high-risk health conditions. This unique book examines the essential elements of community health practice, including logic modeling for planning and evaluation, interdisciplinary collaboration, and the use of technology and telemedicine in social work practice. *Social Work Practice in Community-Based Health Care* presents practical information for social workers in the wake of the insertion of managed care as a third party to the relationship between physicians and their patients, and advances in medical care that are transforming previously acute and life-threatening illnesses to chronic conditions. The book offers a critical analysis of available research and model service delivery innovations, applying evidence-based practice to case studies in a style that is easily accessible to practitioners, administrators, supervisors, and social work students. The book also includes glossaries at the end of each chapter and appendices that analyze online resources and address cultural background assessment questions. Topics discussed in *Social Work Practice in Community-Based Health Care* include: the revolution in funding and delivery evolving trends and healthcare needs of the consumer population a conceptual framework for culturally competent practice the nature of social work in ambulatory health a brief history of healthcare social work emerging practice settings the use of new communication technologies in practice methods for evaluating direct practice ethical considerations current community-based programs for culturally diverse and at-risk populations and much more. *Social Work Practice in Community-Based Health Care* is an important resource for social work practitioners, academics, and students.

About the Author Marcia Egan, PhD, is Associate Professor in the College of Social Work at the University of Tennessee in Knoxville. She collaborates with the UT Institute on Women's Health in an interdisciplinary, community-based, maternal-child health project. Her research on social work health care practice and on resilience among marginalized women is published regularly in several leading peer-reviewed journals. Goldie Kadushin, PhD, is Associate Professor in the Helen Bader School of Social Welfare at the University of Wisconsin-Milwaukee. She is coordinator of the UW-M Interdisciplinary Certificate in Applied Gerontology and is co-author of *Social Work Interview: A Guide for Human Service Professionals*.
