**Kathleen McInnis-Dittrich : Social Work With Older Adults (3rd Edition)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Social Work With Older Adults (3rd Edition):

0 of 0 people found the following review helpful. New to field  
By Maryann Pulliam  
I have just begun my journey into social work with older adults and the book has made some questions clear for me.  
5 of 5 people found the following review helpful. Great Resource  
By A. Carson  
I used this book for my Aging Issues and Service course for my Masters in Social Work. The information in the book is easy to read and covers many areas of the aging process. This is a great resource to have an a beneficial tool for working with older adults.

By Janet L. Seay  
I enjoyed this book on the aging. I learned a lot from this book, and the instructor taught it well. I made an A in this class, because I listened tentively and liked the groups we had.

This text presents a comprehensive overview of the process of assessing the needs of older adults and providing social

and mental health services to meet those needs. The Third Edition of this award-winning text examines the basics of biopsychosocial changes associated with the aging process. Readers are introduced to theories on the biopsychosocial functioning of older adults and are taught how to assess that functioning and plan and implement interventions from a social work perspective. The book includes content on abuse and neglect of older adults, drug and alcohol abuse and the social worker's role in dying, bereavement, and advance directives.
