By Mark Kleinkopf
Has a lot of phrases to direct and ask questions, but it doesn't provide the "how" to respond to answers to directions made and questions asked. The book tells you how to ask a question without giving you the ability to understand the answer. Translates and instructs on phrases you would never use in an optical setting... ex: "I stay up until 11" or "If you break it you buy it"... basically, the book is useless... wouldn't recommend... over priced for the quality and content.

Very helpful and has almost everything you can think of. Great translations for whole conversations including eye conditions that I can't translate with any other source.

I am already fluent in spanish - it was a major of mine. However, you don't learn some of the terminology you need in Optometry - in school. This book fills in all the gaps

Convenient and pocket-sized, this unique eyecare resource helps improve communication and patient care in every office that serves Spanish-speaking patients. It mimics how each member of the eyecare team interacts with patients, aiding clinicians and office workers in formulating explanations, instructions, and questions in Spanish. A companion audio CD-ROM provides the English-to-Spanish translation of every phrase in the book. Covers everything from salutations to case histories and follow up care in the style the eyecare team interacts with patients, related to both administration and procedures. Uses simple, non-technical terms to maximize patient comprehension for both yes/no and open-ended questions. Includes a companion audio CD-ROM that provides the English-to-Spanish translation of every phrase in the book, plus printable patient handouts in Spanish. Features contributions by an ophthalmologist to enhance surgical coverage, while contributions by an optician provide more coverage of dispensing and front office exchanges. Contains anatomical diagrams labeled in Spanish. Provides extensive coverage of contact lenses and specific conditions such as eye injuries. Includes a glossary offering an English-to-Spanish list of common words and phrases divided by categories such as days of the week, interrogative questions, common optometric terms, and other terms in common use that are not necessarily related to optometry. Provides several versions of equivalent expressions so that users with different styles of communication will be able to select the expressions that they like best.
