Colin Fowler BSc PhD FSMC FCOptom, Keziah Latham Petre PhD BSc MCOptom : Spectacle Lenses: Theory and Practice, 1e before purchasing it in order to gage whether or not it would be worth my time, and all praised Spectacle Lenses: Theory and Practice, 1e:

This up-to-date text offers a practical approach to the theory and practice of how spectacle lenses are made and how they work in correcting vision. It also covers the more fundamental aspects of spectacle lens dispensing with relevance to areas such as visual optics and geometric optics.Pitched at the correct level for study - easy to follow for undergraduatesTheory is related to practical reality - so students can take the textbook through to the early years of practiceExtensive examples enable the reader to follow through calculations - great for revision and quick reference!

"I wholeheartedly recommend this book to all students of optometry and ophthalmic dispensing and to practitioners in the dispensing or manufacture of ophthalmic lenses." Andrew Kierl, Senior Lecturer Anglia Polytechnic University
