Jean Rondal, Susan Buckley : Speech and Language Intervention in Down Syndrome before purchasing it in order to gage whether or not it would be worth my time, and all praised Speech and Language Intervention in Down Syndrome:

This text provides speech and language therapists and language researchers with a state-of-the art review covering all aspects of speech and language development in individuals with Down syndrome. Written by leading experts in the field, it includes chapters on: the principles which should guide intervention; prelinguistic development; pragmatics and communication; literacy and language; augmentative communication; intervention with adolescents and adults; maintenance of skills for older adults; and a perspective on pertinent issues. Each chapter summarizes research and provides guidelines for effective interventions. This book should be a valuable guide to those working in the field who wish to be able to provide evidence-based interventions for individuals with Down syndrome and to contribute to their quality of life by improving their communication skills.
